

Moving Google Analytics & Google Ads into your K Clinics Workspace

For the account owner · ~15 minutes · You need a computer (not a phone)

Your website statistics (**Google Analytics**) and your advertising account (**Google Ads**) are still owned by your **old personal Google login** — the one that first set them up. Your new **K Clinics Workspace login** (for example `owner@kclinics.co.uk`) has no access yet, so the website cannot read your traffic and the Analytics page shows an error.

Good news: nothing gets moved or deleted — all your history stays exactly where it is. You simply **give your new login permission** to the two accounts, then **connect it once** inside the K Clinics admin. Follow the parts in order.

Have these ready before you start:

1. Your **OLD** Google login (the one that owns Analytics & Ads).
2. Your **NEW** K Clinics login, e.g. `owner@kclinics.co.uk`. **Write it down** — you'll type it a few times.
3. Both passwords. Do this at a desktop/laptop.

Part 1 · Give your new login access to Google Analytics

- 1 Open a web browser and go to `analytics.google.com` . Sign in with your **OLD** Google login (the one that owns Analytics).
- 2 At the very **bottom-left** of the screen, click the **gear icon** `⚙ Admin` .
- 3 You'll now see two columns. If you have more than one website listed, click the **property dropdown** at the top and choose your **K Clinics** website property first. Then, in the right-hand column headed **Property**, click `Access management` .
- 4 At the **top-right** of the list, click the blue `+` button, then click `Add users` .
- 5 In the **Email addresses** box, type your **NEW** K Clinics login exactly — e.g. `owner@kclinics.co.uk` .
- 6 Leave `Notify new users by email` **ticked**.
- 7 Under **Direct roles and data restrictions**, choose `Administrator` . **Leave the two data-restriction boxes unticked**.
- 8 At the **top-right**, click `Add` .

Done when: your new email appears in the **Property access management** list with the role **Administrator**.

Now copy your Property ID (you'll need it in Part 4)

- 1 Still in `⚙ Admin` , in the **Property** column click `Property details` (older menus call it `Property settings`).
- 2 Near the top you'll see **PROPERTY ID** — a number such as `123456789` . **This is NOT the G-XXXXXXX tag**. Copy the number and keep it for Part 4.

Add roles and data restrictions

Add

Email addresses

owner@kclinics.co.uk

☒ Notify new users by email

Direct roles and data restrictions

☒ Administrator — full control of this property

☐ Editor

☐ Marketer

☐ Analyst

☐ Viewer

Google Analytics → ⚙ Admin → Property → Access management → + Add users

Google Analytics — the “Add roles and data restrictions” panel (numbers match the steps above). Live screenshots: see the official link at the end.

Part 2 · Give your new login access to Google Ads

- 1 Go to `ads.google.com`. Sign in with your **OLD** Google login (the one that owns the ad account).
- 2 In the left-hand menu, click **Admin** (near the bottom). Then click **Access and security**.
- 3 Make sure the **Users** tab is selected (top of the table).
- 4 Click the blue **+** button above the table.
- 5 In the **Email** box, type your **NEW** K Clinics login exactly — e.g. `owner@kclinics.co.uk`.
- 6 For **Select an access level**, choose **Admin**.
- 7 Click **Send invitation**.

Done when: your new email shows in the **Users** list with the status “**Invitation sent / pending.**”

Google Ads — **Admin** → **Access and security** → **Users** → **+**, then invite your new login as **Admin**.

Part 3 · Accept the invitations from your new login

- 1 Open a fresh browser window (or an **Incognito/Private** window so it doesn't reuse the old login).
- 2 **Google Analytics:** usually **nothing to accept** — access is granted immediately. The “Notify” email is just a heads-up.
- 3 **Google Ads:** open the inbox of your **NEW** login (e.g. `owner@kclinics.co.uk`). Find the email titled “**You’ve been invited to access a Google Ads account.**” Click **Accept invitation**, sign in with the new login if asked, and confirm.

Done when: signed in as your **new** login, you can see the ad account at `ads.google.com` and the website property at `analytics.google.com`.

Part 4 · Connect it inside the K Clinics admin

- 1 Sign in to the K Clinics admin at `kclinics.co.uk/admin` as usual.
- 2 In the left menu open **Marketing** → **Connections**.
- 3 On the **Google** row, click **Reconnect** (it may say **Connect**).
- 4 A Google sign-in window opens. **This is the important bit:** choose your **NEW** K Clinics login (`owner@kclinics.co.uk`) — **not** the old one. If it shows the old account, click **Use another account** and sign in with the new one.
- 5 On the blue permissions screen, **leave every box ticked** and click **Continue** (or **Allow**).
- 6 Now set the property number: open **Settings** → **Credentials**. Find **GA4 property ID (numeric)** and paste the number you copied in Part 1. Click **Save**.

Done when: open **Marketing** → **Website analytics** and reload — your visitor numbers appear instead of the red error banner.

Admin · Marketing · Connections

Google
Ads · Analytics · Search

Reconnect **3**

Then set Settings · Credentials ·
GA4 property ID (numeric)

Choose an account

K **owner@kclinics.co.uk**
use this one ✓ **4**

old personal login
do not use

+ Use another account

Inside K Clinics: click **Reconnect**, then pick your **new** Workspace login in Google's account chooser, and paste the numeric Property ID.

If something doesn't work

What you see	What it means & what to do
"You don't have permission to add users"	You're signed in with the wrong account. Sign in with the original owner login that created Analytics / Ads, then retry that part.
The analytics page still shows the red 401 / "returned an error" banner after connecting	In Part 4 you must pick the new login in the Google window, and that login must have at least Viewer on the property (Part 1). Click Reconnect again and choose the new account.
Numbers look wrong / from the wrong site	The Property ID in Part 4 must be the number of the property that holds this website's data. Re-check it in Analytics → ⚙ Admin → Property details.
You can't find the invitation email (Ads)	Check spam, and confirm you typed the new email correctly in Part 2. You can re-send from the same Users list.

Optional · Full ownership later

The steps above **share** the accounts with your K Clinics login, which is all the website needs and keeps every bit of history. If you later want the accounts **fully owned** by K Clinics (for billing and long-term control), that's a separate, heavier process — transferring ownership/billing — best done once everything above is working. The official guide is linked below.
